

DRAWING OF A SEDFE

Here is a brush drawing of a sedge.

The person who made the drawing knew how to handle his brush well.

He knew how to make a wide or a narrow stem with a single firm brush stroke. He could also make a blade with one stroke. See how crisply he made the heads of the sedge.

Select a grass or sedge. Arrange it well.

Then paint it with brush and ink or color. Paint the main parts with firmness and directness. Then complete the drawing.

How many kinds of grasses and sedges can you find?
